- Begin with all 7 dice.
- After each roll, fill 1 line or lose 1 die and reroll.
- You may lose a die voluntarily to reroll.

FILLING LINES

- Match every symbol shown on the selected line.
- Infantry-number lines use the total infantry rolled; meet or exceed the value.
- Placed dice remain locked for the turn.

TARGETING

- First filled line locks the target castle.
- Attack a central castle or a rival’s faceup castle.
- A rival castle adds its special Daimyo line.

CONQUEST & CLANS

- Fill every required line to take the castle.
- Complete a clan: flip and stack the clan; it is protected.
- Failed attack: return dice and pass play left.

AFTER EACH ROLL Fill exactly 1 new line → reroll remaining dice OR lose 1 die and reroll

2 SCORING SUMMARY

INDIVIDUAL CASTLES

- Score the printed front value of each faceup castle.

COMPLETED CLANS

- Score the clan value on the back/top card instead of adding individual castle values.

- Then most completed clans.
- Still tied: share the victory.

3 STRATEGIC TIPS

GOOD HABITS

- Scan multiple targets before committing.
- Prioritize rare-symbol lines early.
- Watch opponents nearing a clan.

COMMON MISTAKES

- Switching targets mid-turn.
- Reusing locked dice.
- Forgetting the Daimyo line when stealing.

COMPETITIVE

- Value clan completion over a single castle.
- Steal only when the extra line is realistic.
- Use voluntary rerolls to rescue weak starts.

4 END OF GAME

- Trigger: the final castle in the center is conquered.
- The game ends immediately.
- Add faceup castle values and completed-clan values.
- Apply the tiebreakers shown in Scoring Summary.
- Highest final score wins.
