

7 WONDERS - QUICK RULES

Game Overview and Setup

SETUP

- Give each player 1 Wonder board and 3 coins (value 1 each).
- Prepare each Age deck. Return cards not used for the player count to the box.
- For Age III, randomly add Guild cards: 3 players: 5; 4: 6; 5: 7; 6: 8; 7: 9. Shuffle them into the Age III deck.

GAME OVERVIEW

Goal

Play through Ages I, II, and III. After Age III, total victory points; the highest score wins.

Each Age

- Deal 7 cards to every player. Each Age lasts 6 turns.
- Choose 1 card and place it face down. Reveal simultaneously.
- Use the chosen card for one action: build the structure; build the next Wonder stage; or discard it for 3 coins.
- Pass the remaining hand: left in Ages I and III; right in Age II.
- On turn 6, play one card and discard the final unplayed card.

TURN REMINDER

Choose -> Reveal -> Resolve -> Pass

TYPICAL 4-PLAYER SETUP

Example table layout. Keep Age decks, coins, and conflict tokens accessible.

BUILDING IN 7 WONDERS

Structures

- Coin cost: pay the bank.
- Free: build the structure without payment.
- Resource cost: use resources produced by your city or buy from neighbors.
- Chain: if you built the named prerequisite in an earlier Age, build the linked structure free.
- You may not build the same named structure twice.

Wonder Stages

- Build stages from left to right. Pay the shown resources, then place the selected card face down under the board.

Production and Commerce

- Resources come from the Wonder board and brown, gray, and some yellow cards.
- Resources are not spent. A produced resource may be used every turn.
- Trade only with adjacent neighbors. Each resource costs 2 coins, unless modified by an effect.
- A neighbor cannot refuse a purchase. Selling does not prevent the owner from using that resource.

END OF AN AGE

After the sixth turn, resolve military conflicts with both neighboring cities.

- Higher shield total: gain a Victory token for that neighbor. Age I: +1; Age II: +3; Age III: +5.
- Lower shield total: gain a -1 Defeat token.
- Equal shield total: neither player gains a token.
- Each player resolves both neighbors, so a player may receive 0, 1, or 2 tokens per Age.

AGE FLOW

- Deal 7 cards >
- Play 6 turns >
- Discard last card >
- Resolve conflicts

CARD QUICK READ

- Top left: resource or coin cost
- Top center: card name
- Main area: effect
- Bottom: chain information / minimum player count

END OF GAME AND SCORING

After resolving the Age III conflicts, total points in these categories:

- Military: total conflict-token points.
- Treasury: 1 VP for every 3 coins. Ignore leftover coins.
- Wonder: points printed on completed stages.
- Civilian structures: points on blue cards.
- Commercial structures: points on yellow cards.
- Guilds: points shown on purple cards.
- Science: score each symbol set and each symbol family.

SCIENCE FORMULA

- Square the count of each symbol type.
- Add 7 points for each complete set of 3 different symbols.
- Science score = symbol squares + complete-set bonuses.

Highest total victory-point score wins.
