

1. GAME OVERVIEW

- A cooperative, story-driven adventure for 1-4 players. Explore locations, examine objects, combine items, and solve puzzles together.
- The story unfolds through numbered cards and Adventure Book entries. Decisions change available clues, locations, and outcomes.
- Do not open or read components until instructed.

2. SETUP CHRONOLOGY

- Place the location cards, character cards, figure stands, adventure cards, markers, and Adventure Book as shown by the opening instructions.
- Choose characters and place the matching figures at the indicated starting location. Keep each character card visible.
- Sort decks and chapter materials without examining hidden information. Reveal only the cards specifically named by the setup text.
- Read the introduction aloud and apply all chapter-specific instructions before the first turn.

3. TYPICAL TABLE SETUP

4. TURN FLOW

- Players take turns in the order specified by the game. The active player uses the available actions for that turn.
- Typical choices include moving, examining a location or card, talking to a character, using an item, or combining items.
- Read and resolve resulting card text or Adventure Book entries immediately. Add, remove, or replace components only when instructed.
- After the active player finishes, continue with the next player unless the story changes the turn flow.

5. INTERACTIONS & CODES

- Numbered locations, characters, and items point to entries or combinations. Enter or read the resulting number only when a chosen action directs you to do so.
- When combining two items, use the game's stated combination method and follow the resulting instruction.
- If an attempted interaction produces no valid result, leave the components unchanged and continue play.
- Keep discovered clues, names, symbols, and codes visible or written down for later use.

6. ITEMS & INVENTORY

- Place gained items where all players can see them unless instructed otherwise.
- Items may be examined, used at locations, or combined with other items.
- Discard, flip, or replace an item only when directed.

7. STORY PROGRESSION

- New cards and locations appear as the narrative advances.
- Choices may permanently change available paths or information.
- Do not search unused cards or read ahead in the Adventure Book.

8. SPOILER-FREE TIPS

- Take notes and revisit earlier clues when progress stalls.
- Discuss theories before spending limited actions.
- Check whether an item can be used, combined, or examined in a different context.

WHEN THE GROUP IS STUCK

Review every visible number, symbol, item, character, and location. Confirm which interactions have not been attempted.

Follow the game's help or hint instructions rather than revealing hidden cards or reading ahead.
