

1. GAME OVERVIEW

- Players: 2-4. Move adventurers across the kingdom, collect companions and equipment, defeat fog creatures, and pursue the selected adventure's scoring goals.
- Movement is always forward across the board. Careful positioning determines which discoveries remain reachable.
- Highest score at the end of the chosen adventure wins.

2. SETUP CHRONOLOGY

- Place the game board centrally. Choose one adventure and place its overview sheet nearby; follow all adventure-specific setup and scoring instructions.
- Each player chooses a color, places the scoring marker on the score track, and places the required adventurers on the starting edges.
- Shuffle the terrain cards and prepare the face-down deck. Place swords, companions, herbs, gold, fog creatures, and dice beside the board.
- Reveal and resolve the initial terrain cards as the selected adventure directs.

3. TYPICAL TABLE SETUP

4. TURN FLOW

- At the start of the turn, reveal 2 terrain cards and place the matching pieces on their board coordinates.
- Move 1 adventurer any number of spaces to the right, downward, or diagonally down-right. An adventurer may never move left or upward.
- Resolve the destination space: collect items or companions, or fight a fog creature.
- If no adventurer can make a legal move, the player takes no movement but the game continues.

5. BOARD ITEMS & COMPANIONS

- Gold and herbs are collected when an adventurer ends movement on their spaces.
- Swords improve combat strength. Companions join the adventurer and add strength or other benefits shown by the game.
- An adventurer can carry collected items and companions as allowed by the rules and selected adventure.
- Plan routes before moving because passed spaces cannot be revisited by that adventurer.

6. FOG CREATURE COMBAT

- Choose the adventurer and companions participating in the fight.
- Roll dice and add applicable swords or bonuses. Compare the result with the creature's strength.
- Resolve victory or failure exactly as shown by the creature and adventure rules.

7. SCENARIO SCORING

- Each adventure changes how points are earned and may add special goals or penalties.
- Use the overview sheet throughout play rather than relying on one universal scoring method.
- Move the scoring marker whenever the adventure instructs.

8. STRATEGIC TIPS

- Keep several adventurers available in different rows and columns.
- Do not move past valuable items unless the route supports a stronger objective.
- Balance immediate pickups with companions, combat capability, and scenario scoring.

MOVEMENT CHECK

1. Select one adventurer.
2. Move only right, down, or diagonally down-right.
3. Stop on one destination.
4. Resolve the destination.
5. Confirm the route does not strand other adventurers needed for later goals.
