

1. GAME OVERVIEW

- Players: 2-4. My City is a legacy tile-placement game played across 24 episodes in 8 chapters.
- Every player develops a personal city board. New envelopes gradually add rules, pieces, stickers, and lasting board changes.
- This guide summarizes the common foundation. The current episode rules always take priority.

2. SETUP CHRONOLOGY

- Each player takes the same personal board used throughout the campaign, places the animal-symbol side face up, and writes a city name at the top.
- Place each scoring token on 10. Each player takes the 24 buildings matching the animal symbol and arranges them face up beside the board.
- Shuffle the 24 construction cards and place the deck face down in the center. Each card corresponds to one building shape.
- Open only the envelope for the current chapter and apply its setup changes. Keep a pen available for permanent campaign updates.

3. TYPICAL TABLE SETUP

4. STRUCTURE OF A TURN

- Reveal the top construction card. All active players simultaneously find the matching building.
- Each active player either places that building on the personal board or passes. Once placed, a building cannot be moved.
- If a player passes but remains in the episode, lose 1 point. A player may instead end participation for the episode and lose no point for that or later cards.
- Continue revealing cards until the deck ends or every player has ended participation.

5. PLACEMENT RULES

- The first building must touch the river. Every later building must share at least one side with a previously placed building.
- Buildings may cover only light-green construction spaces. They may not cover the river, mountains, forests, or other buildings.
- Buildings may cross the river only when every covered space is legal; the river itself cannot be covered.
- Buildings of the same color do not need to touch. Episode instructions may add exceptions or new terrain effects.

6. CORE SCORING

- Start each episode at 10 points unless the current episode says otherwise.
- Lose 1 point for each empty light-green space.
- Lose 1 point for each visible rock symbol.
- Gain 1 point for each visible tree symbol. Episode-specific objectives then modify the score.

7. CITY-BUILDING TIPS

- Keep the river area flexible because the first piece must connect there.
- Avoid narrow gaps that remaining shapes cannot fill.
- Cover rocks when practical, but preserve trees when the placement cost is reasonable.
- Ending participation can be better than repeatedly losing points from impossible placements.

8. LEGACY REMINDERS

- Do not open future chapter envelopes early.
- Apply stickers and write on boards only when instructed.
- Keep each player with the same board and building set across episodes.
- Record progress after each episode so the campaign resumes accurately.

END OF EPISODE

- Complete all current episode scoring and legacy instructions, including any symbols, stickers, or rewards.
- The episode winner is determined by the current rules. The overall campaign tracks lasting progress across all 24 episodes.
