

## 1. GAME OVERVIEW

- Players: 1-4. Draft colored dice to create a stained-glass window over 10 rounds.
- Each die has a color and a shade represented by its value. Follow the window pattern and adjacency restrictions.
- Score public objectives, the private color objective, and Favor Tokens; lose points for empty spaces.

## 2. SETUP CHRONOLOGY

- Place the Round Track in the center. Shuffle Tool Cards and reveal 3. Shuffle Public Objective Cards and reveal 3. Put all 90 dice in the bag.
- Deal each player 1 secret Private Objective, 2 Window Pattern cards, and 1 Window Frame. Choose 1 of the 4 available pattern sides and slide it into the frame.
- Take Favor Tokens equal to the selected pattern difficulty, shown near the pattern name. Place the matching Score Marker beside the Round Track.
- Choose a start player and give that player the Dice Bag. Return unused setup cards and patterns to the box.

## 3. TYPICAL TABLE SETUP

## 4. STRUCTURE OF A ROUND

- The start player draws and rolls 2 dice per player plus 1 extra die to create the Draft Pool.
- Beginning with the start player, each player takes 1 turn clockwise. Then turn order reverses, giving each player a second turn.
- On a turn, draft and place 1 die, use 1 Tool Card, do both in either order, or pass.
- Place the final unused die on the current Round Track space. Pass the Dice Bag clockwise; the new holder begins the next round.

## 5. DICE PLACEMENT RULES

- The first die must be placed on an edge or corner space. Every later die must touch an existing die orthogonally or diagonally.
- A colored space requires a matching die color. A numbered space requires a matching die value. A white space has no pattern restriction.
- Orthogonally adjacent dice may never share the same color or the same value. Diagonal matches are allowed.
- A die may not be moved after placement unless a Tool Card explicitly allows it.

## 6. TOOL CARDS

- Pay Favor Tokens to use a Tool Card and follow its text exactly.
- The first use costs 1 token. Place the token on the card.
- If a Tool Card already has a token, later uses cost 2 tokens.
- Each player may use no more than 1 Tool Card per turn.

## 7. END-GAME SCORING

- Score each of the 3 Public Objective Cards.
- Add the values of dice matching the color on the secret Private Objective Card.
- Add 1 point for each unused Favor Token.
- Lose 1 point for every empty space. Highest score wins; ties favor more unused tokens, then reverse final-round order.

## 8. STRATEGIC TIPS

- Protect scarce legal spaces early, especially restrictive colors and values.
- Check orthogonal neighbors before drafting; a legal pattern match can still violate adjacency.
- Plan for multiple public objectives rather than maximizing only one.
- Save Favor Tokens for Tool Cards that resolve otherwise unfillable spaces.

## QUICK CHECK BEFORE PLACING A DIE

1. First die on edge/corner?
2. Connected to the window?
3. Matches printed color/value?
4. No orthogonal neighbor with the same color?
5. No orthogonal neighbor with the same value?
